WHY TRACK B MATTERS

The Institutional Pathway

AWS Academy gives member institutions free, ready-to-teach curriculum. The step that stops most colleges becoming members is the requirement that educators hold an AWS certification before accreditation.

This programme clears that step as a by-product: **faculty finishing Track B arrive at the accreditation gate already certified**, and students completing an Academy course receive twelve months of free AWS Skill Builder access.

A standardised skeleton. The same five-module stream structure runs in every stream, so delivery, assessment and certification stay standardised while the domain content changes entirely.
